SUMMARY

Java Backend Developer (final-year CSE) with hands-on experience building production-grade systems using Spring Boot, Spring Security, and REST APIs. Built GradElevate — an AI-powered career platform with 30+ endpoints and Gemini AI integration. Strong DSA foundations, J.P. Morgan virtual internship, and a proven ability to ship real, working backend systems.

EXPERIENCE

Software Engineering Virtual Experience — J.P. Morgan & Co. (Forage)

Pune, India — March 2026

- Implemented Apache Kafka for event-driven communication and Spring Data JPA/Hibernate for database persistence, simulating a production-grade backend pipeline across 3+ service modules.
- Validated 10+ REST API endpoints via Postman and wrote JUnit unit tests covering core business logic; independently explored microservice patterns beyond the assigned scope to strengthen understanding of distributed systems.

Technologies: Java, Spring Boot, Spring Data JPA, Hibernate, Apache Kafka, Postman, JUnit

PROJECTS

GradElevate — AI-Powered Career Guidance Platform | [Github](#)

Sep 2025 – Present

- Built a full-stack AI career guidance platform from scratch — features include a weighted scoring algorithm, dual onboarding paths (AI career finder + quick profiler), and a skill roadmap engine with prerequisite ordering and progress tracking across 40+ career paths and 100+ skills.
- Integrated Gemini 2.5 Flash API for ATS resume scoring, job description matching, keyword extraction, and structured JSON feedback generation; system supports 20+ AI-assisted tools with curated learning resources per skill.
- Secured with Spring Security + JWT authentication: implemented role-based access control (USER/ADMIN), forgot-password email flow, Admin Panel with full CRUD, and global exception handling across 30+ REST endpoints

Stack: Java, Spring Boot, Spring Security, JWT, Spring Data JPA, PostgreSQL, Gemini AI, Maven, Git

Smart Result Management System | [Github](#)

Aug 2025 – Nov 2025

- Designed and deployed a full-stack result management system serving 200+ student records, with role-based access (STUDENT/ADMIN) secured via Spring Security and JWT authentication.
- Built an Admin Panel with complete CRUD operations for managing student records and results; student-facing interface supports marks viewing, grade display, and on-demand PDF result generation via roll number lookup.
- Architected a layered backend with 10+ tested REST APIs (Postman), Thymeleaf-based frontend, and MySQL database — structured with clean separation of Controller, Service, and Repository layers.

Stack: Java, Spring Boot, Spring Security, JWT, Spring Data JPA, MySQL, Thymeleaf, Postman

SKILLS

Languages	Java, Python, C, C++
Frameworks	Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, JWT Auth
APIs & Tools	REST API Design, Postman, Git, GitHub, Docker, Apache Kafka, Maven, Spring AI
Databases	MySQL, PostgreSQL, SQL — Joins, Indexing, Normalization, Query Optimization
AI Integration	Gemini AI API, Spring AI, ChatGPT API (ATS scoring, resume analysis, JSON feedback)
DSA	LeetCode / GFG — arrays, graphs, dynamic programming, trees

EDUCATION

Rajiv Gandhi College of Engineering Research and Technology, Chandrapur

2022 – Present

B.Tech – Computer Science and Engineering | CGPA: 7.9 / 10 | Relevant Coursework: DSA, Machine Learning, Operating Systems

Higher Secondary (Class XII) | Janata Mahavidhyalaya Chandrapur | score: 75%

2022

Secondary (Class X) | St. Michaels School | score: 85%

2020

CERTIFICATIONS

Java Backend Development — Spring Boot & Microservices (Learn Code with Durgesh / LCWD), Mar 2026
