

SAKIB AYAN SHEIKH

Java Backend Developer | Spring Boot | Microservices | REST APIs | MySQL

+91 72489 56819 • ayansheikhpersonal@gmail.com • github.com/ayansheikh47 • linkedin.com/in/ayansheikh47 • Pune, Maharashtra

PROFESSIONAL SUMMARY

Final-year Computer Science Engineering student with hands-on expertise in Java backend development using Spring Boot, Spring Security (JWT), Spring Data JPA, and Microservices architecture. Currently completing an industry-grade backend course covering Kafka, Docker, Spring AI, and cloud deployment. Delivered a JP Morgan virtual engineering internship involving Kafka-based event-driven systems and JPA integration. Actively building a full-stack IRCTC clone with microservices and AI integration. Seeking a Java Backend or Full Stack Developer role where I can build scalable, production-grade systems from day one.

TECHNICAL SKILLS

Languages	Java (Primary), Python, C, C++
Frameworks	Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, REST APIs
Microservices	Eureka Server, Feign Client, API Gateway, Spring Cloud, Resilience4j
AI Integration	Spring AI, ChatGPT API, DeepSeek, Generative AI (Spring Boot)
Messaging	Apache Kafka, RabbitMQ, Event-Driven Architecture
Databases	MySQL, PostgreSQL, JPQL, Native Queries, Indexing, Normalization
DevOps / Tools	Docker, Docker Compose, Git, GitHub, Maven, Postman, IntelliJ IDEA
Concepts	JWT Authentication, OAuth2, OOP, DSA, MVC Architecture, AOP

PROJECTS

RailEase — IRCTC Clone (Major Project)

Jan 2026 – Present

- Engineered a microservices-based train booking system with separate services for User Auth, Train Search, Booking, Payment, and Admin — mirroring real-world IRCTC architecture.
- Implemented JWT-based authentication and role-based authorization (Passenger / Admin) using Spring Security across all services.
- Integrated inter-service communication using Feign Client and Eureka Service Discovery with centralized API Gateway routing.
- Added Spring AI integration for an intelligent seat recommendation chatbot, querying available trains using natural language.
- Containerized all microservices using Docker and Docker Compose for consistent local development and deployment.

Tech Stack: Java, Spring Boot, Spring Security, JWT, Microservices, Feign Client, Eureka, API Gateway, Spring AI, Docker, MySQL

Smart Result Management System

Nov 2025 – Jan 2026

- Built a RESTful backend system to manage academic results for 500+ students with full CRUD operations and role-based access.
- Designed normalized MySQL schema with JPA entity relationships (Student, Subject, Result) and optimized queries using JPQL.

- Implemented JWT authentication to secure all API endpoints, differentiating Student and Admin access levels.
- Tested all 15+ API endpoints using Postman; achieved zero regression across build iterations using JUnit unit tests.

Tech Stack: Java, Spring Boot, Spring Data JPA, Hibernate, Spring Security, JWT, MySQL, Postman, Maven, Git

Study Material Provider — Telegram Bot

Jun 2025 – Oct 2025

- Developed an automated Telegram Bot actively used by 200+ CSE students to distribute notes and previous year papers.
- Implemented category-based query handling, delivering course-specific material on demand with fast response time.

Tech Stack: Python, Telegram Bot API, File Management

WORK EXPERIENCE

Software Engineering Virtual Internship | J.P. Morgan Chase & Co.

Mar 2026 | Remote

- Integrated Spring Data JPA and Hibernate to enable seamless database persistence in a simulated banking application.
- Implemented event-driven communication using Apache Kafka, improving system throughput and decoupling service components.
- Designed and validated 10+ REST API endpoints using Postman, ensuring correct request/response handling and error coverage.
- Wrote JUnit test cases to validate core business logic, maintaining code quality in a team-simulated engineering environment.

Tech Used: Spring Boot, Apache Kafka, Spring Data JPA, REST APIs, JUnit, Maven, Postman

EDUCATION

B.Tech — Computer Science Engineering

Aug 2022 – Present

Rajiv Gandhi College of Engineering Research and Technology, Chandrapur | CGPA: 7.9 (Current) |
Relevant: DSA, DBMS, Machine Learning

Higher Secondary (Class XII)

2022

Janata Mahavidhyalaya | 75%

Secondary (Class X)

2020

St. Michael's School | 85%

CERTIFICATIONS

Java Backend Development (BackendX — Spring Boot & Microservices) — Learn Code with Durgesh (LCWD)

Jan 2025 – Present

Software Engineering Virtual Experience — J.P. Morgan Chase & Co. (Forage)

Mar 2026

LEADERSHIP & EXTRACURRICULAR

- Treasurer, Association of Computer Technocrats (ACT) — RCERT (2025–2026): Managed annual tech fest budget of ₹50,000+, coordinated events for 300+ participants.
- Joint Secretary, Association of Computer Technocrats (ACT) — RCERT (2024–2025): Organized technical workshops, coding competitions, and guest lecture series.
- District-level Football Player — represented Chandrapur district in state-level inter-district competitions.
